SUMMARY

BCA student with strong hands-on experience in artificial intelligence, machine learning, and full-stack development. Experienced in building production-oriented systems including AI chatbots, computer vision applications, phishing detection systems, and real-time communication platforms. Proven ability to work with real business software systems, scalable web applications, and applied machine learning through internships, freelance work, and industry exposure.

SKILLS

Programming	Python, JavaScript, C, C++, Java
Web	HTML, CSS, Node.js, Express.js, React, Socket.IO, WebRTC
Databases	MySQL, MongoDB
AI / ML	Machine Learning, NLP, OpenCV, TensorFlow, Data Preprocessing
Tools	Git, GitHub, REST APIs, Flask, Gemini API, VS Code

EXPERIENCE

Digital System Analyst VT & GALPK Pvt Ltd, Bengaluru	July 2025 – Present
--	---------------------

- Designed, developed, and maintained business websites for internal operations and client projects, handling deployment, updates, and performance optimization.
- Worked on digital systems and automated workflows, improving process efficiency through structured data handling and validation.
- Gained hands-on experience in managing real-world web applications, business systems, and IT-driven service environments.

Artificial Intelligence Intern CodeAlpha	Dec 2025 – Jan 2026
--	---------------------

- Applied core AI concepts through guided problem-solving tasks and mini projects.
- Strengthened Python-based AI workflows and analytical thinking.

Data Science & Analytics Intern Future Interns	Dec 2025 – Jan 2026
--	---------------------

- Worked with real-world datasets for preprocessing, analysis, and visualization.
- Extracted insights to support data-driven decision making.

Machine Learning & AI Intern Tamizhan Skills	Dec 2025
--	----------

- Built foundational understanding of ML workflows, model building, and evaluation.
- Applied ML concepts to small real-world style problems using Python.

Cyber Security Intern Tamizhan Skills	May 2024 – July 2024
---	----------------------

- Assisted in vulnerability testing, basic network audits, and system security analysis.
- Documented security risks and mitigation observations.

PROJECTS

OPEN WORLD – Anonymous Real-Time Communication Platform (React, Node.js, Socket.IO, WebRTC) Developed a real-time anonymous communication platform with random user matching, peer-to-peer video/audio communication, and low-latency connectivity using WebRTC and Socket.IO.

Real-Time Face Recognition System (Python, OpenCV) Developed a real-time computer vision system for face detection and recognition using OpenCV for security-related use cases.

Phishing Website Detector (Python, Flask, Machine Learning) Built an ML-based web application to identify phishing websites using feature extraction and classification techniques.

AI Chatbot with Gemini API (Python, Gemini API) Developed an LLM-powered chatbot capable of generating contextual and human-like responses.

Handwritten Digit Recognition (Python, TensorFlow, CNN) Implemented a convolutional neural network model to recognize handwritten digits with high accuracy.

Email Spam Detector (Python, NLP, Machine Learning) Designed a spam classification system using NLP techniques and supervised learning algorithms.

FREELANCE PROJECTS

Company Website & Digital Systems — VT & GALPK Pvt Ltd Built and supported the company website and assisted with internal digital systems.

Personal Portfolio Website — Client: NagaBhushan and Anjali Designed and developed a responsive personal portfolio website.

EDUCATION

Bachelor of Computer Applications (BCA), Srinivas University, Bangalore
CGPA: 9.17 (Current)

2023–2026

AWARDS & RECOGNITION

Best Employee of the Year — VT & GALPK Pvt Ltd
Best Digital System Analyst — VT & GALPK Pvt Ltd

CERTIFICATIONS

Artificial Intelligence Virtual Internship — CodeAlpha (with LOR)
Basics of Artificial Intelligence: Learning Models — UniAthena (Cambridge IQ)
IBM Artificial Intelligence Fundamentals
Full Stack Development Master Class

ACTIVITIES & COMMUNITY

- Member of Google Developer Community and NVIDIA Developer Community.
- Active GitHub contributor with multiple real-world projects.
- Regular participant in technical workshops and hands-on learning programs.
